Personal Profile

I am a software engineer with over a year and a half of experience in the field. In my role as a software engineer I have had the opportunity to work on a range of projects and develop my skills in various technologies.

I am always looking for opportunities to acquire more knowledge and improve my skills. I am excited to contribute to the development of innovative solutions and to continue growing professionally in the field of software engineering.

Career Summary

Software Engineer

JP Morgan & Chase - Sep 2021 to present

- Designed and implemented solutions for clients, covering a wide range of technical and business problems.
- Served as a mentor in an internship program, providing guidance and technical support to students to help them develop their skills and knowledge.
- Learned about software processes and architecture, gaining a deep understanding of how to design and implement software systems efficiently and scalably.
- I designed in figma and developed together with a team, a web application for project management, using technologies such as react, typescript and python. I also participated in the deployment of the project on the server.
- Refined tasks and reviewed pull requests to ensure the quality and consistency of code and processes.

Education

National Technological University 2018-2021

Superior Programming Technician.
